

Set of round and half round HSS saw blades for cutting wide range of materials with oscillating power tools. Half round blade is dedicated especially to cutting materials in hard-to-reach areas.

# Oscillating saw blades

used for multifunctional power tools

**MATERIAL** - made of high quality HSS-DMo5 subjected to heat treatment, which ensures a homogenous material structure, high hardness (63-65HRC) and resistance to abrasion, maintaining adequate elasticity of the blade at the same time.

**LESS CUTTING RESISTANCE** - thin HM-tip (kerf) of blade – 0,5mm only, guarantees less cutting resistance which makes cutting much easier and effortless.

**UNI HOLE** - universal hole enables fixing of the blade in the most of power tools available of the market.

**UNIVERSAL USAGE** - ability to cut wide range of materials, starting from hard materials such as steel, ending at soft ones such as plastic.

## FEATURES / BENEFITS:

- ▶ made of high quality steel HSS-DMo5 (SW7M)
- ▶ production of tools using the newest technologies:
  - heat treatment ensures optimal hardness and structure of material maintaining sufficient flexibility at the same time
  - grinding teeth which guarantees long tool life and ensures optimal working conditions
- ▶ thin HM-tip (kerf) of blade – 0,5mm only, guarantees less cutting resistance which makes cutting much easier
- ▶ symmetrical tooth form 60° is an optimal solution for oscillating cutting of various materials
- ▶ universal hole enables fixing of the blade in power tools made by FEIN, AEG, Milwaukee, BOSCH, DREMEL, ROCKWELL, CRAFTSMAN, MASTERCRAFT

## APPLICATION:

- ▶ dedicated especially to cutting materials such as sheet steel and metals (including colour ones), plastics and composites, wood and wood derived materials, some of building materials, i.e. sandwich panels, plasterboards, etc.
- ▶ sheet steel to 1mm thickness, metals (including colour ones) to 2mm thickness, fiberglass and PVC to 4mm thickness, wood and wood derived materials to 10mm thickness
- ▶ half-round saw blades thanks to its shape allows to cut in hard-to-reach places, i.e. right next to the wall
- ▶ designed for multifunctional oscillating power tools MULTI CUT or MULTI TOOLS type

		set	
FP152-0083-0000	Oscillating saw blades – round 83x0,50/200t	1	
	Oscillating saw blades – half round 83x0,50/133t		

## Information:

- a set includes round saw blade 83x0,50 /200t – 1 piece and half round saw blade 83x0,50 /133t – 1 piece;
- bulk packaging: 10 sets

## FEATURES / BENEFITS:

- ▶ made of high quality steel HSS-DMo5 (SW7M)
- ▶ production of tools using the newest technologies:
  - heat treatment ensures optimal hardness and structure of material maintaining sufficient flexibility at the same time
  - grinding teeth which guarantees long tool life and ensures optimal working conditions
- ▶ thin HM-tip (kerf) of blade – 0,5mm only, guarantees less cutting resistance which makes cutting much easier
- ▶ symmetrical tooth form 60 degrees is an optimal solution for oscillating cutting of various materials
- ▶ universal hole enables fixing of the blade in power tools made by FEIN, AEG, Milwaukee, BOSCH, DREMEL, ROCKWELL, CRAFTSMAN, MASTERCRAFT

## APPLICATION:

- ▶ dedicated especially to cutting materials such as sheet steel and metals (including non-ferrous ones), plastics and composites, wood and wood derived materials, some of building materials, i.e. sandwich panels, plasterboards, etc.
- ▶ sheet steel to 1mm thickness, metals (including colour ones) to 2mm thickness, fiberglass and PVC to 4mm thickness, wood and wood derived materials to 10mm thickness
- ▶ half-round saw blades thanks to its shape allows to cut in hard-to-reach places, i.e. right next to the wall
- ▶ designed for multifunctional oscillating power tools MULTI CUT or MULTI TOOLS type
