

Its innovative formula was created with the aim of removing heavy soiling in the, carpentry as well as in the wood, furniture and machinery industry.

# GO Cleaner Liquid

for washing and cleaning tools and machinery

**NEW FORMULA** - alkaline product containing surface-active compounds - the agent is highly moisturizing and penetrates stains. It is also gentle for the cleaned surfaces, e.g.: plastics, aluminum, rubber seals.

**FAST ACTION** - persistent, both petroleum and resin-based soiling is removed in 15 minutes - just spray the cleaned surface directly and leave for 5 to 15 minutes for the GO Cleaner to dissolve any dirt, then wipe with a cloth to collect loose layers of dirt.

**ONE LIQUID - TWO JOBS** - GO Cleaner is a two-task agent: the first task is to separate the dirt from the cleaned surface, and the second - to protect the cleaned surface against external factors.

**VERSATILITY** - copes well with dirt on cutting tools arising from the woodworking, especially green wood (removes resin), tools such as trimmers, lawn mowers, chainsaws, chain or soiled machine parts and charred windows.

## EXPERT ADVICE:

- ▶ Any tool that does not have a special coating and is used for cutting of materials such as wood (especially green), plastic (pvc, rubber, gaskets) is at risk of the material sticking to the blades and the surrounding area (disc, body, teeth).
- ▶ The buildup of dirt in these areas increases the cutting resistance, which can lead to excessive heating of the disk and a loss of stability of operation or even destruction of the tool.
- ▶ Using GO Cleaner for washing and cleaning your tools, you will avoid problems with the wrong wear assessment of the tool, which should be maintained appropriately so it can serve you long.
- ▶ It is not recommended to use GO Cleaner on hot items.

INDEX	INFO	MU	BOX	PRICE LIST
		pcs	pcs	
TO100-0000-0500	GO Cleaner 500 ml	1	10	
TO100-0005-0000	GO Cleaner 5 L	1	1	
TO100-0010-0000	GO Cleaner 10 L	1	1	
TO100-0020-0000	GO Cleaner 20 L	1	1	

## FEATURES / BENEFITS:

- ▶ as one of the few on the market, GO Cleaner is not subject of the requirements of ADR in transport, which significantly reduces transport costs (it is non-flammable)
- ▶ alkaline product containing surface-active compounds - the agent is highly moisturizing and penetrates stains.
- ▶ two-task agent: the first task is to separate the dirt from the cleaned surface, and the second - to protect the cleaned surface against external factors.
- ▶ GO Cleaner can also be safely neutralized with water and is also safe for work clothes - does not affect the structure of fibers
- ▶ gentle for the cleaned surfaces, e.g.: plastics, aluminum, rubber seals.
- ▶ the composition of GO Cleaner was developed by Polish chemists, and its production takes place in the Polish chemical plants

## APPLICATION:

- ▶ cleaning saws, cutters, heads, drills, tools used in gardening, such as trimmers and lawn mowers, chainsaws - removes resin and all petroleum-based soiling
- ▶ particularly dedicated to tools, which often cut fresh and wet wood (with much resin)
- ▶ works well for cleaning dirty machine parts
- ▶ spray the cleaned surface directly and leave for 5 to 15 minutes for the GO Cleaner to dissolve all dirt and then wipe with a cloth to collect loose dirt
- ▶ for best results, use the immersion method: immerse the cleaned workpiece in GO Cleaner from 15 to 30 minutes, then take it out and wipe with a cloth to collect loose dirt - concerns such tools as: saws, cutters, heads, and drills
- ▶ for smaller dirt GO Cleaner may be diluted in the ratio 1:1 up to 1:2, but in this case the reaction time is extended - it is recommended to use undiluted
- ▶ in the case of very large surfaces and accumulated dirt, penetration may take longer, thick layers of dirt may require repeated washing
